REMITY

CROSS-BORDER DIGITAL PAYMENT SOLUTION

Remity ensures secure, fast global transfers with real-time compliance and fraud detection.

WHY IT IS THE ULTIMATE CROSS BORDER SOLUTION?

All-in-One Platform

A customer-facing mobile app and back-office system that handle **everything from payments to compliance**.
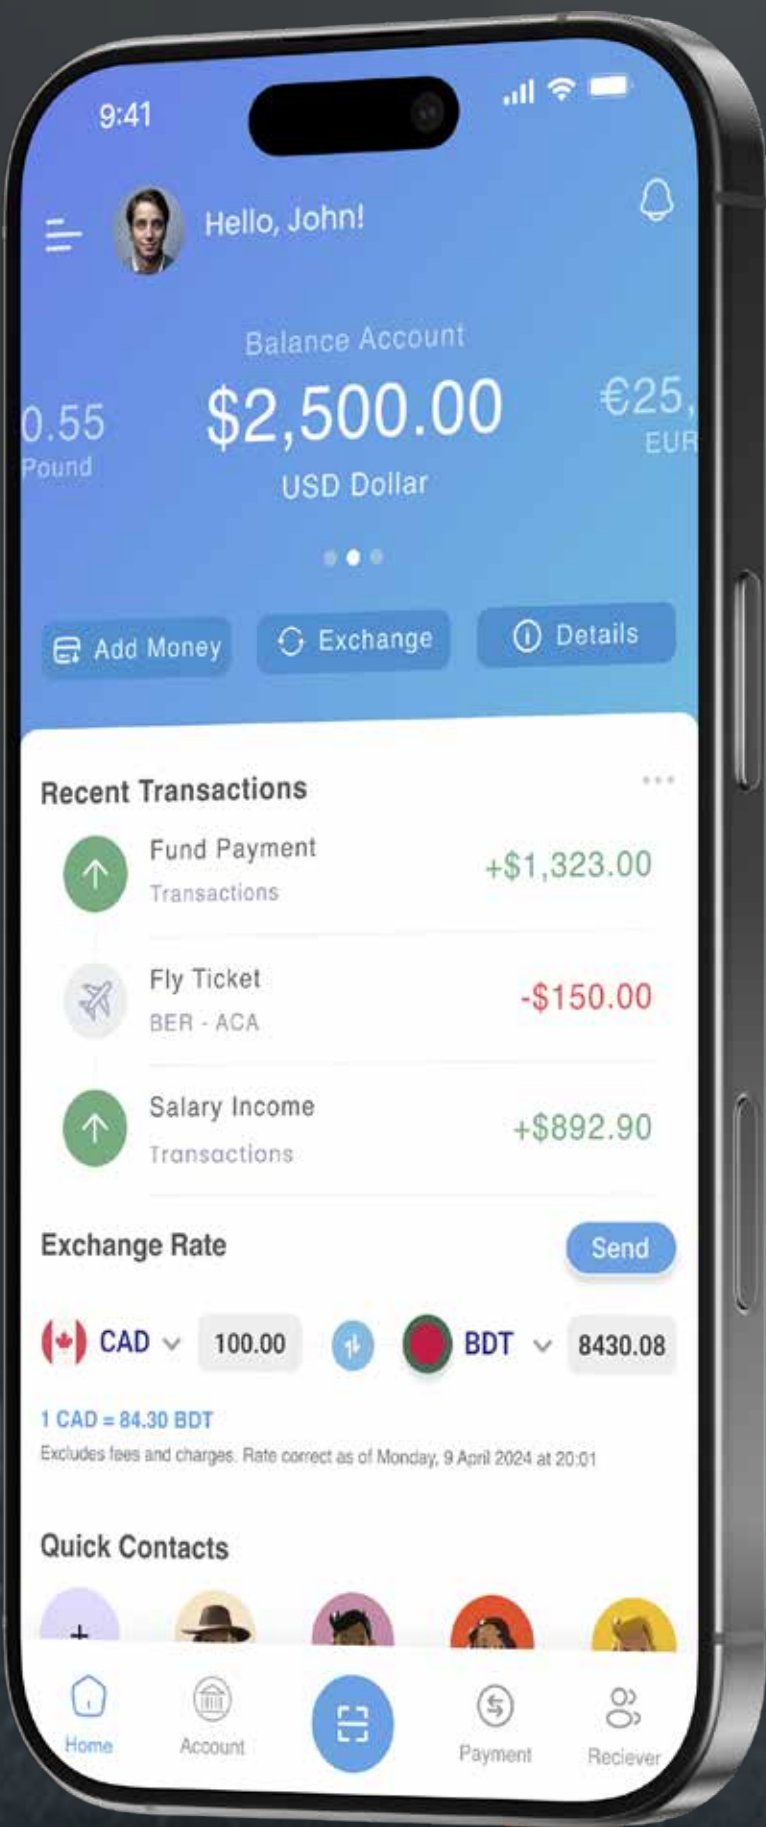

Global Reach, Local Expertise

We have capability to support **100+ currencies** and comply with regulations in **50+ countries**.

Proactive Security

With PEP Screening, Sanction Screening, and **Transaction Monitoring**, your business stays safe and compliant.

Transparency You Can Trust

No hidden fees, no surprises just straightforward pricing and real-time updates.

FX Deals That Save You Money

Get the best exchange rates with our exchange scope.

Grow Together

Our **Referral Reward program** incentivizes growth and rewards loyalty.

Customer Success Story

When onboarding one of our key clients from the UK market, a major concern kept coming up compliance. They said, "Compliance is a real maze. If you can't maintain it, you're preparing a legal minefield for yourself." They had every right to worry. To launch their solution, they needed to navigate complex KYC, AML, and Sanction regulations. The stakes were high: one misstep could lead to penalties, frozen accounts, or worse service shutdowns.

We took their concerns seriously and built compliance into the core of their solution. From day one, we designed an architecture that met international regulatory standards, integrating Dow Jones data for real-time sanction screening. But compliance was just the beginning. We developed an inbuilt Transaction Monitoring System for instant fraud detection and security breaches.

But we didn't stop there. We suggested features in their product backlog which empowered the way to drive growth. We found this story isn't just about navigating regulatory hurdles it's about turning challenges into opportunities.
